DETAILED ACTION

Response to Arguments

1. Applicant's amendments filed 10/11/2005, with respect to the rejection(s) of claim(s) 1-3, 8-10, 13, 15-19 under 112 1st and 2nd have been fully considered and in light of these amendments the previous rejections have been withdrawn. However, applicant's amendment necessitated the new ground(s) of rejection in view of Brady Jr. et al (6,973,479).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 8-10, 13, 15-19 rejected under 35 U.S.C. 102(e) as being anticipated by Brady Jr. et al (6,973,479).

Brady teaches a CSS for use in a mobile platform having a plurality audio subsystem and a plurality of lighting system (2155, 2120) a crew interface subsystem (1100), inherently the management terminal (1100) and the AV controller have a controller for outputting signals to the subsystems, and zone modules (area distribution boxes 2150), and a plurality of dedicated switched

data busses (1500 & 200), where the busses comprise 100 Base T Ethernet cables (see figure 3), wherein the zone switching modules are configured in any networking series that would make sense (see Col. 9, lines 1-3, including star and series networks). Brady inherently discloses, "look up tables" (which are nothing more than a data structure that looks up the state of a subsystem, determines if information is being transmitted, from where, and to whom).

Re – Claims 18 and 19: Where Brady teaches the CSS, the operation thereof is also disclosed.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
